By J. Jacobs
This book offers good textual information about what one can see along a particular route. But the directions are not sufficient in themselves. Each route recommends the map that should be purchased in order to navigate the route. Not recommended if you are looking for a single book to show you your way around Holland.

Exploring the backroads of Holland by bike, boat, car or train will lead the reader through a beautiful landscape of working windmills, romanesque churches, old cathedrals and new amusement parks, waterways and dikes, national parks and reclaimed polders. This book contains over 20 proposed tours with maps and illustrations to help readers find out-of-the-way places in Holland.
