Tony Kirby : The Burren The Aran Islands: A Walking Guide before purchasing it in order to gage whether or not it would be worth my time, and all praised The Burren The Aran Islands: A Walking Guide:

2 of 2 people found the following review helpful. Good local detailBy Alp WalkerGood local detail, and a beautiful area (I only went to the Burren). I like the extensive knowledge of the local environment, plants, animals and history on display. However, most walks involve walking long sections on tarred roads (which in fairness is a feature of many

walks in this area). The only long walk in my perception that did not involve any significant walking on roads was in the Burren National Park. Looking at Internet walking sites, others have found ways to walk off-road for extended periods, but of course there may be right of way problems. Elsewhere there seemed to be little effort to find routes that avoided roads. Another bugbear is that there is no master map to locate the smaller maps. Also, large dots mark the walks, robbing the reader of seeing the route in more exact detail. All in all, this seems like a decent start, and it is the only guide that I could find, hence the four stars, but surely a better edition, or another better book, will soon come along. 0 of 1 people found the following review helpful. Thank you By H. Shaw This is just what I needed. How forward of the publisher to put this out as an ebook. Perfect maps, illustrations, and descriptions.

The Burren and the Aran Islands, with their unique combination of flora, fauna and landscape, are explored by large numbers of walkers annually. This is a guide to some of the best walking routes in the region, with lucid descriptions and additional information to enhance the walkers' enjoyment and appreciation of the place. From the rugged interior to spectacular coastal scenery, from challenging upland walks to shorter road and waterside excursions, this selection has something for everyone.

'What better companion than a pocket-sized handbook' Sunday Independent 'It really captures the strangeness of this landscape with its furrowed clints and grykes. Not earthly, not lunar. Somewhere in between' Dan MacCarthy - Irish Examiner
