new hereBy the piperI got this short book for free on zipped through it in about 10 minutes. Everything there can be found on Google. Prices listed can change thus making the information incorrect. Maps are so small on a Kindle that they are unreadable useless. The photos on a Kindle are in black white so not interesting. I think this little book has been made up put out to capitalize on the Olympics when everyone is watching things in London. I will delete it.
