Kim Inglis : The Gainsborough Bath Spa before purchasing it in order to gage whether or not it would be worth my time, and all praised The Gainsborough Bath Spa:

Housed in three interlinking Classical-style buildings in honey-toned Bath stone, The Gainsborough Bath Spa from YTL Hotels is an exciting addition to this UNESCO World Heritage site. Explore the city within the pages of this book, learn about its history and experience its cultural attractions, then retire in style to the city's newest five-star hotel. Here, the lodgings are luxurious, the food and beverage outlets are super-styled and the service is second to none. In addition, The Gainsborough Bath Spa is the only hotel in the UK that has a direct link to mineral -rich thermal waters, so there's a superb thermal water journey that respects the Roman tradition of sequential temperature bathing and a bespoke menu of exotic therapies. If that weren't enough, YTL Hotels has also been receiving many an accolade for its creative approach to the buildings' architectural renovation. Not only are the Grade II listed Georgian facades pristine, the interiors have been styled sensitively with respect for the original Victorian fabric of the various edifices and the fittings and furnishings are truly sumptuous. A stay here is truly a memory to treasure - as is a visit to Bath itself.
