**Cerinto : The Northern Way to Saint James: starting at Ribadeo** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Northern Way to Saint James: starting at Ribadeo:

1 of 1 people found the following review helpful. Very disappointingBy Margaret WilsonBook was obviously translated from Spanish to English, very badly and made for interesting reading but very disjointed and sometimes hard to follow. Not very well written and he said some very strange things. Would not recommend0 of 0 people found the following review helpful. The Path to OneselfBy Robert W. FischerI agree totally with the author's embrace of El Camino de Santiago. Not only have I experienced first hand the many possibilities that the Camino offers, but I have

found it provides the landscape in which one can meet oneself...where am I in life, what am I doing, what's important to me, what and who do I really cherish.RW FischerDenver, CO

The Way to Saint James is quite an experience, you meet a lot of people, young and aged, learned and a bit simpleton, professionals and labourers, urban and country people, writers and poets and just plain people, even some children accompanying their parents, and so on; kind and unkind, silent and talkative, fat and skinny, briefly people of every sort; you talk to them, exchange views, get acquainted with their philosophy, learn some of their words and expressions, get their e-mail addresses, in short, make a lot of friends. Every life is a world! You enjoy walking along paths, forest trails and paved roads, going through grooves, climbing hills, crossing ancient bridges over unknown rivers, discovering new places, meeting rural people, learning about their legends, eating their meals, watching cathedrals and monuments... You feel renewed, you love life, you want to repeat.

About the AuthorWhen he was 13 years old, one of his compositions won a national high school literary award and again when he was 14. He studied Physics at the University and then taught there Mathematics; later he taught Physics in a Brazilian college. He spent two summers working at a labor camp in England. He was a full-time Nestle translator in Switzerland. He won three short story prizes and one of his novels was a finalist in a chicano literary contest. Now he publishes his books through .
