From Oxford University Press : The Physical Geography of Northern Eurasia (Oxford Regional Environments) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Physical Geography of Northern Eurasia (Oxford Regional Environments):

This is the third volume in The Oxford Regional Environments series. The series volumes are devoted to major regions of the world, each presenting a detailed and up-to-date body of scientific knowledge concerning a particular region. For most topics on the physical geography of Northern Eurasia abundant literature now exists. Most of it, however, is in Russian and other East European languages and this has significantly limited the number of potential

readers. This volume will seek to familiarize, at an international level, those with an interest in this area with the most significant achievements in classical and current geographical research.

About the Author Maria Shahgedanova is a Lecturer in Climatology and Director of Postgraduate Studies, Geography Department, University of Reading.
