I have ordered other books by the same authors from you when I was travelling to Italy. I was equally pleased. The delivery was on time and the condition of the books was excellent. I will definitely order in the future. Regards, Marnie Droppelman 12 of 12 people found the following review helpful. Best guide to southern France By C. Hilton I've owned a number of guide books for southern France and examined many more and this is the one I would pick if I could only take one. Rick Steves Provence is good but does not completely cover Provence. After finding too much out of date information in a "new" Lonely Planet I don't trust what I read there. Michelin Green Guide contains valuable information but the organization is troublesome. When I travel to other places I'll look at the guides by Facaros and Pauls first. 0 of 0 people found the following review helpful. Lots of info By Daphnali Very good and comprehensive, it helped me very much on my trip solo to the Languedoc. Complemented by Let's Go France, it was a winning combination.

A revised and updated edition of the Cadogan bestseller, this guide includes new design, color maps, additional

illustrations, new area and city maps, a special guide to the best beaches and an expert's guide to the wine routes of the region. There is a guide to the local markets (arguably the best in Europe) and illustrated panels throughout on the food specialities and crafts of the region, including traditional recipes and shopper's tips.

"Standouts these days are Cadogan Guides...sophisticated, beautifully written"--American Bookseller
